**Art Unit: 1732**

**1. Claim 5 is objected to because of the following informalities: In claim 5, "polyster" should be --polyester--. Appropriate correction is required.**

**2. Claim 1 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. In claim 1, applicant recites providing recycled clothes and/or fabric remnants as raw material, applicant is suggested to change the recital "raw material" to --starting material-- because the step could be interpreted that the recycled clothes and/or fabric remnants are processed into elemental cotton and/or other fibers. Applicant is suggested to note and correct all instances where "raw material" is used throughout the claims. Also, it is unclear what applicant means by "fibrous shoddy" from the dictionary, "shoddy" means "inferior quality, cheaply imitative, etc." therefore it is unclear what is meant by fibrous shoddy, does applicant mean that the fibers are all different lengths and sizes from shredding? Suitable explanation is required.**

**3. Claims 2-12 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.**

**4. Claim 1 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.**

**5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Horton, Fourmeux both teach methods of making insulation from used cloth materials, but neither reference teach the particular steps nor the additional ingredients of flax and polyester fibers to the used cloth materials to make the insulation as claimed.**
